Description: The SAM® Splint products are malleable splints built from a thin core of aluminum alloy adhered between two layers of foam. The SAM® Splint is extremely pliable and when bent into any of three simple curves, becomes rigid to provide support for injured limbs.

Classification/Rule: Class I, by Annex IX, Rule 1
Generic Name: Splint, mouldable
Conformity Assessment Route: Annex VII
Notified Body: NSAI (NB # 0050)

SAM Medical Products declares under its sole responsibility that the above products to which this declaration relates, and which bear the CE Marking, are in conformity with the applicable requirements of EC Directive 93/42/EEC of 14 June 1993.
